CYNGOR IECHYD CYMUNED

COMMUNITY HEALTH COUNCILS ARE independent statutory organisations that represent the interests of the patient and the public in the National Health Service. We are the independent NHS 'watchdog' in Wales concerned with all aspects of NHS care and treatment.

Your local Community Health Council consists of voluntary members who work to ensure that the patient needs and views are taken into consideration in the planning and delivery of local NHS services.

What do we do?

- We seek the views of patients and the public on local services and use that information to inform our work with the NHS. We are the link between those that plan and deliver the service and those that use the service.
- We inspect NHS premises and make recommendation for improvement where necessary.
- We scrutinise the NHS and work with service planners and providers to improve the patient experience of services.

How can we help you?

- We provide information for patients and the public about local NHS services.
- We can support patients in their dealings with the NHS
- We provide a free and independent advocacy service that offers confidential support, advice and guidance for those wishing to make a complaint against the NHS.

By telling us about your experiences of the NHS: we want to hear your views on the services in your area.
