

FLU CAN KILL

PROTECT YOURSELF AND OTHERS WITH A FREE VACCINE

Flu spreads easily and can be very serious for some people. That's why flu vaccine is now free in Wales for people who work as a carer, caring for people in their own home.

Having your vaccine not only protects you from catching flu, it also protects you from spreading it to people around you, who may be vulnerable to flu and its complications.

This includes:

-  **Your patients or clients**
-  **Your colleagues**
-  **Your family**

Get your **free** flu vaccine at your local community pharmacy.
Don't miss out!
